# The table below lists the characters allowed in the Unicode
# representation of
# IDNs associated with the French language. The # symbol denotes start of a
# comment that
# continues to the end of line.
#
# Registrants are advised to carefully consider the potential confusion
# over
# the perception of equivalence between an accented Latin character and a
# sequence of other Latin characters (with or without accents.) There
# exists no
# equivalence rule that can be applied universally as any such mappings are
# generally dependent on the language, culture and context in which an IDN
# is
# used.
