# The table below lists the characters allowed in the Unicode
representation of IDNs associated with the Swedish
# language. The # symbol denotes start of a comment that continues to the
end of line.
#
# Registrants are advised to carefully consider the potential confusion
over the perception of equivalence between # an accented Latin character
and a sequence of other Latin characters (with or without accents.) There
exists no
# equivalence rule that can be applied universally as any such mappings are
generally dependent on the language,
# culture and context in which an IDN is used.
