

	1. Did you have a chance to read the discussion document?	1. Beyond any initial update, how would the adhering to RFC5733 to RFC5733 impact on your business?	2. Do you think Nominet should adhere to RFC5733 to RFC5733 EPP standards?	1. Beyond any initial update, how would the removal of compatibility with the defunct automaton (i.e. the auto-population of the 'Organisation' field of a contact by Nominet's systems) impact on your business?	2. Do you think Nominet should remove compatibility with the now defunct automaton auto-population of the Organisation field in .UK and utilise EPP contacts as other registry operators do?	1. Beyond any initial update, how would allowing registrars the ability to DELETE a domain impact your business?	2. Do you think that enabling the DELETE command for registrars would require checks and balances in a process?	3. Beyond any initial update, how would amending domain listing limitations from being based on DELETES to being based on CREDIT of CREATE fee impact your business?	4. Do you think an Add Grace Period Limits policy should replace the 'Use of the delete and investigation lock operations' acceptable use policy?	1. How would removing the limitations on investigation lock impact your business?	2. Do you think limits on the investigation lock should be removed?	1. Beyond the initial update, how would amending the lifecycle of .UK in this way impact your business?	2. Do you think we should amend the lifecycle of .UK?	1. Beyond the initial update, how would amending the transfer process of .UK in this way impact your business?	2. Do you think we should amend the inter-registrar transfer process of .UK?	1. How would amending the Registrar Agreement to have a single TAG type impact your business?	2. Do you think Nominet should implement one level of accreditation?	1. Conform with EPP standards RFC5730->RFC5733	2. Allow registrars to use the DELETE command	3. Remove AUP limits for Investigation Lock	4. Update .UK Lifecycle to match gTLDs	5. Unify tag types	6. Change Inter-registrar transfer process to PULL
